

GreenPeak Vacancy

GreenPeak is a leader in battery-free communication technology for wireless sense and control applications. Our revolutionary technology utilizes energy-harvesting to facilitate battery-free operation in a totally wireless environment, without the need for either communications or power connectivity.

→ GreenPeak Technologies brings **wireless** and **battery-free** solutions for **sense and control networks** with **high reliability** and **standard compliance**.

To further strengthen our team, we currently have a vacancy for a

Senior Embedded Software Engineer

Your profile

- ▶ You have a strong theoretical background and at least 7 years of hands-on experience in embedded software development and communications systems
- ▶ You have solid, hands-on experience in embedded C programming on different microcontroller platforms
- ▶ You are creative and efficient in debugging and testing embedded systems
- ▶ You preferably have an in-depth knowledge of state-of-the-art wireless protocols such as IEEE 802.15.4 and ZigBee
- ▶ You have an open personality and you do not fear direct contact with customers. Occasional (international) trips are not a problem for you

Our offering

- ▶ Early-adopter job in growing high-tech company: you really make the difference
- ▶ Extremely dynamic working environment: new ideas are born and implemented as fast as you can manage
- ▶ A highly visible internationally oriented position

At GreenPeak, people make the real difference!

If you would like to join our young and dynamic team and if you are convinced you will be a real asset to GreenPeak, we would be delighted to receive your CV.

GreenPeak

Stephan Noel - Team Leader Software
