

GREENPEAK ISO 14001 CERTIFIED FOR ITS ENVIRONMENTAL MANAGEMENT SYSTEM

GREENPEAK'S GREEN VISION FORMALIZED UNDER THE ISO 14001 STANDARD ILLUSTRATING ITS COMMITMENT TO MINIMIZING ENVIRONMENTAL IMPACT

Utrecht, Netherlands – 16 December 2010 – [GreenPeak Technologies](#), a leading fabless semiconductor company, offering innovative ultra low power wireless data communication technologies for consumer electronics, today announced its environmental management system received ISO 14001:2004 certification from Lloyd's Register Quality Assurance.

GreenPeak's [green vision](#) was established from day one of its founding, as its technology enables the reduction or elimination of battery usage and energy efficient applications for sensor networks like in homes and buildings. These sensor control networks will also help improve people and companies to increase the awareness of energy consumption and the capability to manage and reduce it.

“GreenPeak is committed to a long term strategy aimed at increased environmental accountability,” [said Cees Links, CEO of GreenPeak Technologies](#). “GreenPeak’s development is focused on the core of what it takes to make our world carbon neutral. The implementation of an environmental management system is therefore a valuable lesson of environmental management for a fabless and green semiconductor company.”

GreenPeak Technologies, already ISO 9001:2008 certified, has integrated the ISO 14001:2004 standard’s requirements into the existing quality management system to provide a streamlined framework to build and manage an environmentally sustainable business.

To achieve ISO 14001:2004 certification, GreenPeak successfully passed a series of comprehensive audits by Lloyd’s Register Quality Assurance, a leading global, independent certification body in this field.

About GreenPeak

GreenPeak Technologies, a fabless semiconductor company, is a leader in the development and manufacture of highly integrated 802.15.4 RF4CE silicon solutions for consumer electronics. This revolutionary technology, based on the IEEE 802.15.4/ZigBee wireless networking standard, allows battery-free (based on energy harvesting) or maintenance-free (no battery replacement) operation in a totally wireless environment, without the need for either communications or power connectivity.

GreenPeak is based in Utrecht - The Netherlands and has offices in Belgium, Japan and Korea.

GreenPeak is backed by venture capitalists: Gimv (Belgium), DFJ Esprit (UK), Robert Bosch Venture Capital (Germany), Motorola Ventures (USA) and Allegro Investment Fund (Belgium).
